Paul K. Feyerabend (1924-1994), one of the most stimulating and controversial figures of Twentieth-Century philosophy, spent most of his formative years in postwar Vienna (1946-1955). Born in Red Vienna, Feyerabend came of age at the time of the Nazi *Anschluss* and completed his philosophical apprenticeship at the University of Vienna during the Allied occupation. At the time of his university studies in philosophy and physics, Feyerabend animated the so-called "Third Vienna Circle" (1949-1953) around Viktor Kraft in the context of the *Austrian College Society*, and actively participated in the *European Forum Alpbach* and in the *Institut für Wissenschaft und Kunst*. In addition, he served as a research assistant to Arthur Pap, who spent 1953/54 as a Fulbright visiting professor at the University of Vienna.

The international conference "Paul Feyerabend and Austrian Philosophy" aims at exploring the milieu which shaped Feyerabend's intellectual development with a focus on his interaction with university teachers and intellectual figures such as members of the former Vienna Circle like Viktor Kraft, Philipp Frank, Herbert Feigl, and Rudolf Carnap, physicists like Felix Ehrenhaft and Hans Thirring, as well as with Walter Hollitscher and Ludwig Wittgenstein. Contacts continued throughout the 1950s and 1960s at the London School of Economics with Karl Popper and, later, with Imre Lakatos, and in Minneapolis, at Feigl's Minnesota Center for Philosophy of Science, in whose series Feyerabend published his pathbreaking "Against Method" for the first time in 1970.

A special symposium on the publication of *Feyerabend's Formative Years*, edited by Matteo Collodel and Eric Oberheim (Springer Nature, two volumes) will be held as part of this conference.

The conference is organized by the Institute Vienna Circle (University of Vienna) and by the Vienna Circle Society. It is partnered with the subsequent *HOPOS 2024*, the Fifteenth International Congress of the International Society for the History of Philosophy of Science, University of Vienna, July 8-12, 2024, and it contributes to the *Feyerabend 2024 Centennial* celebrations.
